DETAILED ACTION

EXAMINER'S AMENDMENT

- 1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. Authorization for this examiner's amendment was given in a telephone interview with the applicant representative, Mr. Siegesmund Rudolf (Registration No. 37,720) on 10/10/2006.

CLAIMS:

a. Referring to claim 1:

Please replace claim 1 as follows:

A method of providing computer screen security for an authorized user comprising:

using a computer program in a computer having a computer screen, creating a scrambled image of an original image by dividing the original image on the computer screen into an array of screen segments; and

changing the orientation of each of the screen segments so that the original image can only be read by the authorized user viewing at a personal display screen electronically connected to a personal display computer;

Application/Control Number: 09/981,881

Art Unit: 2135

wherein the computer and personal display computer are adapted for electronic communication so that the computer program causes the computer to electronically transmit the scrambled image and a parameter to the personal display computer;

wherein the personal display computer uses the parameter to orient each of the screen segments and displays an unscrambled image on the personal display screen so that a user can view the original image on the personal display screen;

wherein the original image is not visible at the computer screen; and

wherein the personal display computer and personal display screen are contained in a set of display glasses.

b. Referring to claim 9:

Please replace claim 9 as follows:

A method of providing security for a computer screen comprising:

using a program in a computer, causing the computer to divide an image into an array of screen segments on the computer screen; and

change the orientation of each of the screen segments to create a scrambled image so that the scrambled image can be read only by a person wearing a set of display glasses and so that the computer screen is incomprehensible to a viewer other than the person wearing the set of display glasses;

electronically transmitting the scrambled image to a personal display computer located in the set of display glasses;

electronically transmitting a codeword to the personal display computer;

responsive to receipt of the codeword by the personal display computer, accessing a parameter from a personal display computer memory; and

wherein the personal display computer uses the parameter to reorganize the scrambled image so that the person wearing the set of display glasses can comprehend the image in an unscrambled form on a display screen of the display glasses.

c. Please cancel claim 11.

d. Referring to claim 12:

Please replace claim 12 as follows:

An apparatus for providing computer screen security comprising:

a programmable processor;

a storage medium;

a program residing in the storage medium;

wherein the program causes the processor to:

divide an image into an array of screen segments on a computer screen; and create a scrambled image by changing the orientation of each of the screen segments so that the scrambled image can be read only by viewing through an array of lens units that reorganize the scrambled image after electronic transmission to a personal display computer connected to an array of lens units;

electronically transmit the scrambled image to the personal display computer; electronically transmit a codeword to the personal display computer; and

wherein the personal display computer uses the codeword to configure the array of lens units to reorganize the scrambled image so that an unscrambled image can be viewed on a personal display screen in a set of display glasses.

e. Referring to claim 13:

Please replace claim 13 as follows:

An apparatus for providing computer screen security comprising:

a computer having a programmable processor connected to a storage medium;

a scrambling program residing in the storage medium;

wherein the scrambling program causes the programmable processor to:

divide an image into a plurality of screen segments and change the orientation of each of the plurality of screen segments so that the image is scrambled;

electronically transmitting a scrambled image to a personal display computer;

wherein the personal display computer unscrambles the scrambled image so that the original image is displayed on a personal display screen connected to the personal display computer; and

wherein the personal display screen has a frame adapted for wear by a user in the manner of glasses.

Response to Arguments

3. Applicant's arguments, filed July 14, 2006 have been fully considered and are persuasive.

Allowable Subject Matter

4. Claims 1-4, 6-9, 12, 13, 16, 18-21, 23-26 are allowed.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nirav Patel whose telephone number is 571-272-5936.

The examiner can normally be reached on 8 am - 4:30 pm (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kim Vu can be reached on 571-272-3859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
